Sector Composition

Performance (30-Day Net Yield⁶%)

*PFM Asset Management is a division of U.S. Bancorp Asset Management, Inc, which serves as administrator and investment advisor fund.

¹7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

²The monthly distribution yield represents the net change in the value of a hypothetical account with a value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the Pool expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

³Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund's sensitivity to potential interest rate changes.

⁴S&P Global AAA_m Rating: S&P evaluates a number of factors, including credit quality, market price, exposure, and management. Please visit [SPGlobal.com/Ratings](https://www.spglobal.com/Ratings) for more information and ratings methodology.

⁵Fitch AA_{af} Rating: portfolios with this rating indicate having the highest underlying credit quality. Please visit [fitchratings.com](https://www.fitchratings.com) for more information and ratings methodology.

⁶As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

¹Source: iMoneyNet First Tier Institutional Money Market Fund Average (iMoneyNet Prime Money Market Fund Index); benchmark yields are as of the last business day of each month. This index is comprised of funds rated in the top grade that invest in high-quality financial instruments with dollar-weighted average maturities of less than 60 days. It is not possible to invest directly in such an index.

Past performance does not guarantee future results. Yields will fluctuate as market conditions change. The current fund performance may be higher or lower than that cited. The yields shown may reflect fee waivers by service providers that subsidize and reduce the total operating expenses of the Pool. Pool yields would be lower if there were no such waivers.
